Art Unit: 1724

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5 drawn to an ion chromatography system, classified in class 210, subclass 198.2.
- II. Claims 6-10, drawn to a solid material exchanging (dispensing) device, classified in class 222, subclass 52.

The inventions are distinct, each from the other because:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the ion chromatography system of Group I does not require the specific material exchanging means (e.g. having a holding section and a chamber associated with this holding section) of Group II, as evidenced by claim 1. The subcombination of Group II could be used in another system, different from that of Group I. For example, this device could be used to exchange sand or activated carbon, instead of ion exchange resin, in a filter; or to remove

and replenish coffee grounds in an automatic coffee maker. Applicant should note that the intended use of the device of Group II, i.e. to transfer ion exchanger material, cannot be given weight in determining its patentability. It is well settled that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter, and because the searches for the individual Groups are not coextensive, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
